Boise Cascade's Industrial 45# density is the most common panel they produce and is used in the manufacture of furniture, kitchen cabinets, consumer electronic cabinets, store fixtures, and game tables. This product is suitable for a variety of finishes (laminates and coatings), but is renowned for its machining performance and edge integrity.

# HARDWOOD PLYWOOD CORE GUIDE

## Particleboard (PB) —

PB is the least expensive of the core options for hardwood plywood construction, offering a smooth, void-free surface for veneer lay-up. PB is very uniform in thickness and density, providing tight thickness tolerances and offers great stability.

## Medium Density Fiberboard (MDF) —

MDF offers great stability and offers a very smooth, void-free surface for veneer. MDF is highly recommended for thin panel applications such as door inserts for cabinets & paneling.

## Standard Veneer Core (VC) —

Made with all veneer core inner plies. Veneer core panels are relatively light in comparison with composite panels. Veneer core offers great strength.

## Combi-Core Panels (CFC) —

Constructed of veneer core inner plies with MDF crossbands. Offers similar strength to veneer core but has the void-free surface quality of MDF. Combi-core panels tend to offer more consistent tolerances than standard veneer cores.

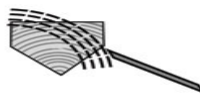

This is a specialty all hardwood “European style”, high-ply-count veneer core blank. This core is often used for decorative applications where the panel edge is revealed.

## PERMAWOOD (OSB CORE)

### Rotary Cut

Entire log is peeled producing a continuous ribbon of veneer.

### Rift Cutting

The quarter log is mounted on a modified lathe to produce a cut that crosses both the growth rings and the rays at a slight angle, resulting in a relatively straight grain effect that minimizes the bold ray flake appearance found in quarter sliced wood.

### Plain Slicing

The half log is mounted with the knife parallel to the center of the “back” of the log, then forced across the knife to produce a flat sawn lumber look, often developing a repeating grain pattern called a cathedral.

### Quarter Slicing

The quarter log is mounted in the slicer so that the knife cuts across the growth rings at approximately a right angle and parallel to the rays, resulting in a highly three dimensional ray flake appearance in red and white oak.

## Slicing Methods

# POLYMER PANELS

This unique and advanced polymer makes the material 25% stronger than the original King StarBoard®. King StarBoard ST is scratch-resistant making it an excellent construction material for cabinetry, case goods and architectural partitions. King StarBoard ST is environmentally stabilized and has been developed to withstand the harshest outdoor conditions. It will not warp, rot, or delaminate when exposed to humidity or water. It can be fabricated using common woodworking tools and techniques.

# PAINT GRADE OFFERING

Time is money, so Bennett Supply is here to get you through the **FINISH LINE** faster.

Be ahead of your competition with the following paint grade offering:

## **FIBERBOARD**

Whether your project calls for deep machining, painting, or any type of lamination. Excel and Excel plus fiberboard from Bennett Supply will keep you moving.

We offer:

3/8"	4x8	Excel MDF
1/2"	4x8	Excel Plus MDF (with MR 50 properties)
5/8"	4x8	Excel Plus MDF
3/4"	4x8	Excel Plus MDF (with MR 50 properties)
3/4"	4x8	Excel Plus MDF
3/4"	5x8	Excel Plus MDF (with MR 50 properties)
1"	5x9	Excel Plus MDF

## **PLYWOOD PLATFORMS**

Classic-Lami II & FX platform plywood is constructed with smooth void-less MDF cross-bands which adds a whole new dimension to the meaning of lightweight strength and surface quality.

Offering:

1/2"	4x8
3/4"	4x8 & 4x10

## **TRADITIONAL PLYWOOD**

Bennett stocks high quality hardwood plywood for your painting needs.

Hard Maple tends to be the preferred specie to paint. Some customers preferred to paint A grades and some will paint D grades. Whatever your preference, Bennett stocks.

Few items of many that we stock:

1/4"	4x8	RC NATURAL MAPLE VC B-4
1/2"	4x8	RC NATURAL MAPLE VC D-3
3/4"	4x8	RC NATURAL MAPLE VC C-2
3/4"	4x10	RC NATURAL MAPLE VC B-2

Special orders are also available. Such as primed 1 side or 2 side panels. These panels give you speed through your shop, just scuff sand the surface and it is ready for the paint. It eliminates several steps in the shop. Especially the bottleneck in the spray booth.

Call your Sales Rep for more information.

# PANEL PROCESSING

Bennett Supply offers a unique service to our customers to help grow **your** business. We can help on larger projects by providing an out sourced specialty panel product and cut part service. Whether it's as simple as having some material finished or simple cut to size parts or a much more complex project, we have the means to source it and have been doing it for over 10 years. We want to help make **you**, the customer, more efficient and cost effective by providing unique service. We can start from simple drawings or from job prints and take it from there to provide a quote. We typically provide "parts" in melamine, plywood, particle board, MDF, HPL Panels, however there's a variety of other products available as well. If you have a job for it, we typically can source it!

This service is restricted to our customer base **only** and is in place to enhance your business. Inquiries are always welcome and we would be glad to assist you in your next project.
